

TRADE SEARCH Online Retrieval System Security Policy

Trade Search is an online retrieval system, which enables clients, and staff to view archived trade sheets from the previous business day or earlier.

This agreement, once signed gives traders permission to view sheets online. Your password allows online access to the reports specified below. Managing General Partners of trading groups will receive access that allows them to see their entire group's accounts. A client who trades under an umbrella group must obtain the signature of one of the Managing General Partners.

.....

I understand that my password is for my use only, and that for legal reasons it is necessary for me to maintain highest security by keeping my password confidential and not give it to others.
